INTRODUCTION

"Hungarian Baja 2019" FIA World Cup for Cross-Country Bajas is held by GARZONE Events Kft. from 8th August to 11th August 2019.

The competition is run in compliance with the Following documents:

- The 2019 FIA International Sporting Code with appendices
- The 2019 FIA Cross-Country Rally General Prescriptions (2019 FIA CCR GP) and the Sporting Regulations of, the 2019 FIA World Cup for Cross-Country Bajas.
- These Supplementary Regulations.
- Official bulletins
- Traffic regulations of Hungary

Modifications, amendments and/or changes to this Supplementary Regulations will be announced only by numbered and dated bulletins (issued by the organizer and approved by the FIA up to the time of the first stewards meeting and thereafter by the stewards).

The event is run together with a National Event with separate regulations and starting 20 minutes after all FIA competitors.

The rally will be twinned with a motorcycle event in the FIM World Cup for Bajas and, therefore the required interval of 30 minutes between the FIA World Cup for Cross-Country Bajas event and the Motorcycle event will be observed.

Separate supplementary regulations for the motorcycle event are available from the organisers. Additional information will be published in Rally Guide, issued on Monday 27. May 2019. on the official website: www.hungarianbaja.com

The official time will be as GPS (Hungarian time = CET = GMT + 2).

Hungarian Baja is the 5th Round of the FIA World Cup for Cross-Country Bajas 2019.

Modifications, amendments and/or changes to these Supplementary Regulations will be announced only by numbered and dated bulletins (issued by the Organiser and approved by the FIA and National Automobil sport Federation of Hungary (MNASZ) up to the time of the first stewards meeting and thereafter by the stewards).

The World Cup is run in parallel with the event of the National Championships and with the event of the Open International Cup (T1, T2, T3, T4, TH, Open)

The event is the 5th event of the National Cross-Country Championship of Hungary with coefficient two.

There will also be:

1. a National and Open International Event with separate regulations and starting after all FIA competitors;
2. a Motorcycle/Quad Bajas World Cup and National Championship event with separate regulations and used same special stages, but different time.

Additional information will be published in the Rally Guide.

20. FINAL CHECKS

Cars subject to final checks (decision by the Steward) must have one representative for the competitor as well as mechanics (in case of dismantling) present at the final check.

Location: Suzuki Mészáros, Gábler Tó str. 10, 8100 Várpalota

Time: from 14:45

21. RESULTS

The Provisional overall classification will be published on the official notice board in the Rally H.Q.

LOCATION: Thury Castle, Hunyadi Mátyás square 1., Várpalota

22. PRIZES

22.1 PRIZE GIVING CEREMONY:

LOCATION: Várpalota Főtér, Szabadság square

TIME: Sunday 11. August 2019 17:00

22.2 PRIZES:

The prizes for Cross Country rally Hungarian Baja will be awarded following:

GENERAL CLASSIFICATION	(T1-T2-T3)	-1st to 3rd Trophys
GROUP CLASSIFICATION	(T1 / T2 / T3)	-1st to 3rd Trophys
CLASS CLASSIFICATION	(T1/1-4)	-1st Trophys
	(T2/1-2)	-1st Trophys
	(T3/1-2)	-1st Trophys (min. 5 participants at the start)

Prize giving for the Hungarian Cross-Country Rally Championship will be held according to the ASN regulations of this series.

The prizes will only be given to Categories, Groups and Classes, if there is a minimum of 5 participants at the start, otherwise only the first given prizes.

22.3. Prizes only will awarded to the crews presenting themselves at the ceremony. Absent crews will lose their right to get the prizes but the classification or the other prizes will suffer no modifications.

23. TV RIGHTS - ON BOARD CAMERA

Competitors wishing to carry an on-board camera must follow the Article 49 of the of the 2019 FIA CCRGP.

Each competitor must:

- 1) send written request to info@hungarianbaja.com
- 2) indicate number and position of all the on-board cameras;
- 3) provide all recordings at the end of each Leg;
- 4) pay a penalty of € 500,00 in case of non-respect of the above rules..

In case of any changes in the Supplementary Regulation, the organizer will release an official bulletin.

In all circumstances, drivers may only participate at the event under their own responsibility.

At the entire route of the event, the national traffic rules must be respected.

ENTRY PROCEDURE

Anybody wishing to perform the Shakedown must inform via email the secretariat of the Event:
info@hungarianbaja.com

ENTRY FEE

Fee received from 21. May to 01. August.	
Entrant (2 hours)	€ 200,00

The price includes:

- VAT 27%
- Insurance
- SHAKEDOWN Road Book
- SHAKEDOWN sticker
- Rescue and Medical preparedness

CONDITIONS TO PARTICIPATE:

- Driver and co-driver must be registered in the Entry Form of HunGarian Baja 2019;
- the vehicle must be the one indicated in the entry form of HunGarian Baja 2019;
- the shakedown fee must be paid;

SHAKEDOWN'S PLATES

To participate at the Shakedown, all identification and advertising panels received at the administrative check, including the Shakedown sticker (1 strip 25 cm x 10 cm to the centre top of the windscreen) must be affixed to the racing vehicle.

SERVICE AREA: Close to the Shakedown zone, the Organiser will provide an area where it will be possible to service on the race vehicles.

RUNNING OF THE SHAKEDOWN

Inside the race car, there will be both competitors registered at the HunGarian Baja 2019 and they must wear clothing and equipment in accordance with CCRGP 1.9.

All vehicles will start with an interval of 2 (two) minutes: the starting order will be based on their arrival at the preset zone and they can make as many laps as they wish in two hours.

Tracking System

Rallyinfo.hu - Technical description of the operation of the GPS system V1

Pic. No. 1.: **GPS box**

Sizes: 115x90x55mm

Weight: 340g + pipe clamps 110g

General operating principle of GPS measurements:

The GPS is an advanced positioning system for three-dimensional position determination, timing and velocity measurements can be carried out by land, sea or air. Accuracy is typically of the order of meters, but the environmental conditions can affect significantly. In the sky from the flat ground there are 7-25 satellites visible at the same time, of which for positioning at least three, for the height above sea level one additional satellite is necessary for determination. The GPS satellites are broadcasting at six frequencies. Each satellite broadcasts spread spectrum signal which may be "pseudo-random noise" called for.

The positioning is based on the theory of analytic geometric methods. The satellite positioning system is based on timing recycle distance measurement. Since we know the velocity of radio waves, and we know the date of issue and receipt of radio waves, can be determined based on the distance of the source of these. In the three-dimensional space knowing the exact measured distance from three known positions we are able to determine the position. Measuring the distance with other satellites we are able to improve this value.

Cause A significant distortion in the system can be caused by the effect of atmospheric to the radio waves. At the description of the calculations we assumed that to simply calculate with the distance = rate x time formula. This is true, but that the speed of radio waves are only constant in the vacuum pressure.

Evaluation of data

The evaluation of uploaded data can be determined inf two different ways.

Initial assessment of the competition supervision interface, real time data available online. This means the data that the device has been uploaded to the central database and downloaded online, analyzed by the supervisory program. The yet uploaded, or not yet analyzed data will be carried over in the subsequent analysis. Not uploaded data case occurs when the device is in the absence of strength of GSM signal, and can not upload data to the central database. In the case where the data is available online in the database, but local network is busy or the downloads has interrupted due to bad network relationship, then the analysis of loss data only partially can take place online.

Alternate method is retrospective data analysis. In this case, the data collected what has been received by a specified time interval sets the database to a file, and the data can be evaluated from point to point.

Vehicle to Vehicle Alarm (VTVA) function

The device has a frequency of 433 MHz using radio module, which is broadcasting the data of an encoded in advance "bagpipe" and SOS functions corresponding sets of data, for the tools staying in range. The range distance can be greatly affected by ambient atmospheric conditions and terrain. The device has adjustable transmission power. This value is not possible adjustable during the race. Currently, the vehicle to vehicle alarm system has two functions:

- "Toot" function, which indicates the overtaking intent of a VTVA equipped car up to 100m distance. Pressing the SOS button, placed in the box, a red LED indicates the start, which lasts for 5 seconds. In the event that the other device receives the sent signal, then this confirms to the sending device and the server uploads the signal, and at the same time, in the overtaken vehicle's SOS panel's LED will lit blue with a beep sound (continuous), and in the overtaker's vehicle the LED color changes from red to blue light, no beep sound here. The indicator remains on the overtaken's vehicle for 10 seconds. Then, each signal is switched off until a next signal.

- Send SOS signal devices within range. This feature will be active if on the SOS panel, the SOS switch is turned on. Send the device continues the signal, until the SOS switch is turned on. In the case where a device receives the SOS signal, on the SOS panel the red and blue LED will blink, with a pulse (0.5 s) alarm signal, as long as is still within range. This feature requires a power supply operation.

Pic.No. 2.: **SOS Panel**

Sizes: 95x48x67mm

Weight: 120 g

Tool installation

- SOS panel, vehicle to vehicle alarm system antenna placement: Previously purchased SOS panel's red and black wires with the 2poled TMWS2T connector must be connected to the 5A fuse mating port (horizontal shoe positive, vertical shoe negative polarity), 15 poled connector's end has to

be wired with the right B column. SOS panel should be placed on the dashboard in such a way that both the driver and the navigator can reach. The adhesive antenna supplied shall be affixed to the top right corner of the windshield horizontally, the end of the cable wired to the right-hand column B.

- Installing the device: The device received at the Administrative check must be connected to the previously purchased and installed SOS panel and vehicle to vehicle alarm system antenna. The device must be fixed in the right column B with 2 clamps so that the device does not move and the visibility ensured.

- To verify the functionality of the device will take place at the Technical Scrutineering.
- At the end of the race the device should be returned to the colleagues, where the deposit will be repayed. In case if the device has any problem, until identifying the problem, the competitor is entitled to the deposit only after a corresponding deduction.
